

Reflection - Research Proposal Presentation

For this assignment, I had to create a short presentation that would demonstrate my ability to understand the key aspects of a research proposal and communicate these in an effective way. Prior to the assignment, I knew that I would need to provide a proposal for my project, but I wasn't fully aware of what would need to go into this. Providing this information in the form of a presentation worked well for me, as I enjoy verbally sharing my ideas and find this easier for me than written work.

As I went through the assignment, I found that there was a considerable amount of work required for the proposal. I didn't realise that information regarding pre-existing literature and ethical considerations would be required, as I believe these to be a separate entity. Because of this exposure however, I believe that I have a better understanding of exactly what will be required of me.

Going forward to my project module, I feel that I will be able to take some of the elements from this assignment into that work, as I decided to base this assignment on what I anticipate to be my actual project proposal idea. This in turn has made me feel more confident in the research work that I will be completing, and has made me feel more excited about this.
